“WE HAVE OUR DARK SIDE OF THE MOON”

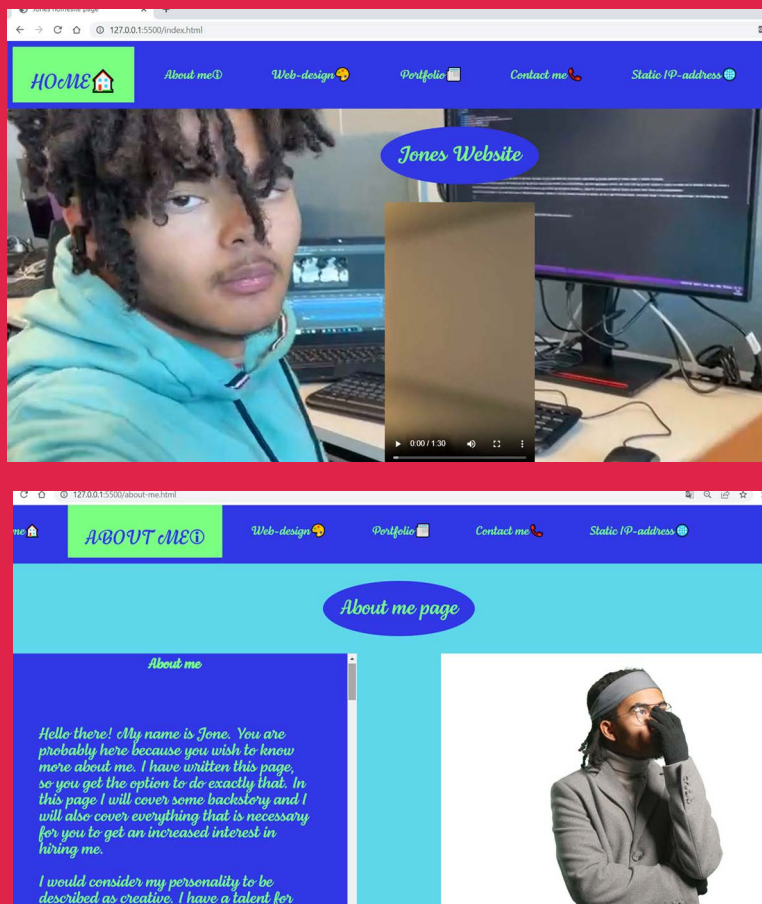

From earth it is nearly impossible to see the dark side of the moon. We know it has another side, but to see photage of it is another matter. Similar too ourselves, we cannot know someones talents by first looks, but we know that someone have something they are good at. I like to believe I am good at many things, but when it comes to information technology and media production, I am someone to look into. If I could describe myself with three words it would be the following: positive, creative, and of course hard working. I can be both cooperative and independent when it comes to work. You could classify me as adaptable.

I have very much interest when it comes to making content of media and i want to invest my time in it. The things I do can be quite challenging to say the least, but I like to keep my mindset in a positve state because that makes me get control of my creativity wich means i can channel my creativity into new ideas and products. I have some past experience inside media production since I have been spending time with it in my freetime. I am certain that media production will be the future! That is why I think educating myself on it is the smartest move on the chess-board if you will, and it makes the proffesion future-proof. Who does not want a future proof job?

THE DARK SIDE OF THE MOON

This is a project i worked with last year. I made a website with a homepage and other pages. All the pages were linked together. The code i used to make this website was HTML and CSS.

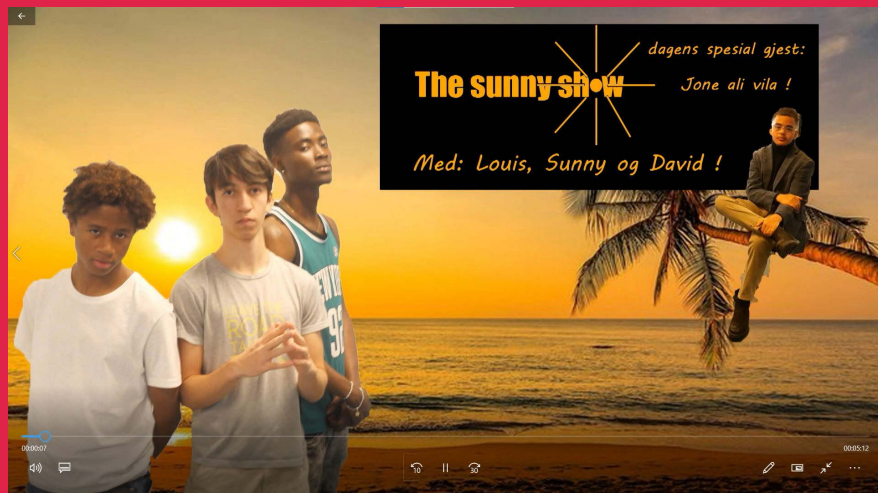

We had a job-assignment that consisted of taking a picture of fruit and making an advertise like the bama company. I used their punchline and matched the colors with the logo. I placed the fruit together and edited it in adobe photoshop to make it look like the sorroundings was dark, and with a reflective plattform it made the fruit shine and stand out.

PASTWORK PROJECTS

These are some projects I have worked with in the past

We have access to a studio room and we had a week where we made studio-projects. All the classes got mixed and then split into different groups. We then made live-show skits. In these live-shows I had the group role of being an actor for two different groups at the same time. I have acting skills because I went to theater classes and because I don't feel pressure when in front of a large crowd.

“In a conversation, I prefer to listen and observe what the other party of the conversation has to say, but I also like to talk what is on my mind. The reason for this is because I can get a better point of view when I first listen to what they say and then later I can give them my point of view and my opinions. It is always wise to observe first so you can take control of the situation after and use it to make you become the one in control of the conversation.”
